EMBROIDERY

Most embroidery that we do costs about \$5-\$6 per item and presents the most professional image.

SCREEN PRINTING

Screen printing is only cost effective for larger quantities (24 or more) of items but does look and wear very well.

HEAT PRESS

Heat press is less expensive and works well for large quantities of t-shirts such as school-spirit wear, team wear, or athletic wear.

With the help of Hall Closet Uniforms, AHOPE for Children has raised thousands of dollars through the sales of [customized] t-shirts and hoodies! We are a small non-profit organization that cares for HIV+ orphans in Ethiopia. We wanted to start a small online store to sell items that would promote AHOPE and raise funds. Hall Closet Uniforms proved to be an invaluable asset by offering us advice about which items would sell best and how to create them in the most economical manner. Hall Closet Uniforms helped us develop a plan that has exceeded our expectations in every way. We are now offering a variety of t-shirts for adults and children, hoodies, and our newest item, AHOPE canvas shopping bags. We hope to continue expanding our selections and have set a goal to raise twice as much money for the children of AHOPE in 2009. Thank you to everyone at Hall Closet Uniforms for your support and help.
